

# MALMÖ™

Malmö is a novelty in our outdoor range.

Decoflame's first patio heater on gas for the favorite plate outside. It is produced with hidden wheels, which makes it easy to move around before starting it up.

It is kept in an elegant and timeless design with rounded corners and glass that does not go all the way to the top and therefore gives an open design.

The gas burner is stainless, so you get a solid and durable product.

It comes in the colors black and corten

Malmö is designed and produced in North Jutland just like the rest of our range.

The perfect patio heater to ensure cosiness and warmth on a cool but lovely summer evening.

## STANDARD FINISH

## TECHNICAL INFORMATION

**NOTE:** Check the hose at least once a month and each time you change the gas cylinder.

**NOTE:** The appliance must not be used if you can smell gas. If this is the case, the gas supply must be disconnected and the fireplace repaired. Do not use the appliance again until all leaks have been sealed.

- There must be a distance of at least 1.5 meters between the product and combustible materials. The fireplace must always be monitored.
- Do not move the Malmö fireplace while it is being used. Keep this product out of the reach of children when the fire is lit and until it has completely cooled down.
- Always close the gas bottle before moving the product.
- Never try to repair the fireplace yourself.
- Never block the airflow to the burner or nozzle. Never block the airflow to the gas cylinder cap.
- If the wind is strong, always brake the product or move it to a quiet place to prevent it from tipping over.
- It is dangerous and strictly forbidden to use this product in an enclosed space! The product is intended to be used outdoors or in a well-ventilated area.
